## TOXIC METAL EXPOSURE AND HEALTHY HEARTBEATS

by: *Eileen Silva*

*Eileen Silva is a metabolic health balancing expert who has appeared on TV and radio talk shows coast to coast, lectured extensively and does individual and group weight management consultations, as well as corporate wellness programs. Her best-selling new release **Fat Chance At Last!---How to Go Beyond Willpower...** joins her other deluxe tape album series 1&2 as well as her unique breakthrough technology, a colored bar graph computerized body analysis, **Body Fitness Profile**. Thousands of clients across the United States have greatly enhanced energy, well-being, weight balance and longevity with Eileen's customized body analysis and wellness coaching.*

Go to the mirror and take a peak at the fillings in your teeth. If they are silver, then you have silver amalgam fillings which contain mercury, a poison. Mercury is not a substance that some of us are sensitive to, it is a poison that negatively affects us all.

We are often combining erratic eating with poor food choices and lack of consistent exercise. So we shouldn't be surprised that almost half of us are dying (either rapidly or by inches) from heart disease. You might be shocked to learn that autopsies performed

on our Vietnam casualties revealed an alarming buildup of plaque in the arteries of men barely entering their twenties.

Some people have had intravenous chelation treatments done for heart problems and/or metal poisoning, but as Dr. Ward Dean, who is a chelation specialist, points out: "I believe that chelation therapy is a positive step towards rehabilitating the entire arterial system and improving one's chances for longterm health... For my patients who do not have the time, who cannot afford or who are medically unsuited for intravenous therapy, I feel oral chelation... is the very best alternative available today."

If you are considering what the implications of this information are for you and your family, you will find the following testimonials of tremendous interest.

**Moses W.:** "I had been experiencing high blood pressure, and it returned to the normal range within days of beginning ByPass. I think

Then glance at the ingredients in your antiperspirant deodorant. Do you see "aluminum" listed? Is there aluminum foil being used in your kitchen? Do you have aluminum baking pans and cookie sheets?

If the answer to these questions is "yes", it is vitally important for your overall health and immune strength that you take action steps immediately to strip these heavy metals from your body.

These heavy metals, incidentally, also cause the cholesterol to collect on arterial walls resulting in increased risk of heart attack and/or disease. Approximately ¾ million Americans succumb to heart disease each year. Every 20 seconds someone suffers a heart attack or stroke.

There is a definite correlation between our American lifestyle and heart disease. We eat too much, we eat too fast, and we eat on the run. Stress is taking its toll on just about all of us.

*everyone needs ByPass! It's a phenomenal product!"*

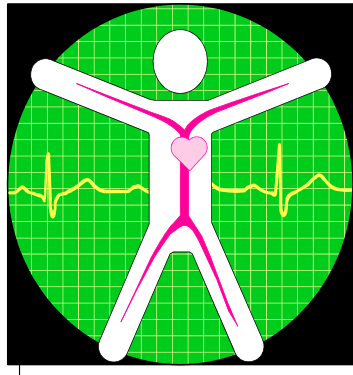

**Taylor H.:** *"I noticed more energy almost immediately, and within 3 days, I had more odorous urine from stripping heavy metals and other toxins."*

**Ruby C.:** *"Wow! I could feel changes in my circulation. I'd had so much energy it's unbelievable."*

**Veronica N.:** *"I am so excited about this product because of heart problems that run in my family! I have so much energy that I don't even want to sleep!"*

**Ann G.:** *"In just a few days, I now have an abundance of energy and a tremendous overall sense of well-being! It's fantastic!"*

Dr. Ward Dean, noted medical doctor specializing in chelation and anti-aging and Dr. Richard Kaufmann, renown research scientist in anti-aging, have combined their expertise to formulate a state-of-the art synergistic oral chelation caplet which is also great for stripping heavy metals. The 180 caplets of **ByPass+**, retails for just \$36.95 and features the revolutionary **Cardiovascular Nutritional Support Complex**, a precisely designed support group of heart and artery caring factors including EDTA, Malic Acid, CoEnzyme Q10, L-Carnitine, Gugulipid, Lipase, Bromelain, and Garlic Extracts.

*P.S. Please pass this report along to someone you care about.*
